

FINCA DON PANCHO

Farm information - Finca Don Pancho
 Finca don Pancho is a small piece of land located nearby the Pachapa village Las Capucas area. The coffee plantation is shaded with legume and plane trees. The micro lot is managed and controlled by the capataz Francisco Villeda Panchito. The harvest is done during the Christmas time. Francisco produces his micro lot from only two hectares of land. With great humility and work he succeeded in affirming the high quality of his coffee despite the incident he had when he was in the army; in fact, during a fire fight he lost his left arm.

Finca Don Pancho is a COCAFAL member www.mycapucascoffee.coop
