

IMPERATOR

Imperator srl is a green coffee trading company, with its headquarters in the heart of Trieste, the leading Italian port in the trading of coffee and among the best at a European level.

With the wealth of over fifty year's experience, running through three generations, the company can satisfy the roasters' requests with a first class offering which is in continuous evolution.

Purity, taste and selection characterise the offer, which with time has been enriched with a flourishing range of certified products (Organic, Fairtrade and UTZ) and specialty coffees.

Every stage of the supply chain process is accurately controlled: the coffee lots we buy are carefully analyzed by their physical and organoleptic aspects; traceability is supervised from origin to final destination, the port of Trieste, recently implemented by DNA analysis on specific lots.

The guarantee of a first class product and a close analysis of the market allows Imperator to assure the quality and to answer and anticipate new trends in the dynamic market of coffee.

Bloom Coffee School, the new soul of Imperator opened on February 2017, is designed to provide a dedicated coffee education program for all: companies, professionals and coffee lovers.

The education approach will be rigorous, but at the same time engaging and social, with the ambitious goal to promote coffee culture and to convey the passion for this beverage.

The school is located in the heart of Trieste, recognized to be the Italian coffee capital, with 5 training rooms divided in 5 specific areas: Barista&Bartending, Brewing, Green&Sensory, Roasting and Lectures.
